

# THE ERGONOMICS LEADER

## GTS-1930 SABER STRIPPER

FASTER. SAFER. EASIER.

### FASTER

- **40% faster** task completion vs. competitor
- **70% faster** than using a knife
- Decreased time in hand and therefore decreased ergonomic impact

### SAFER

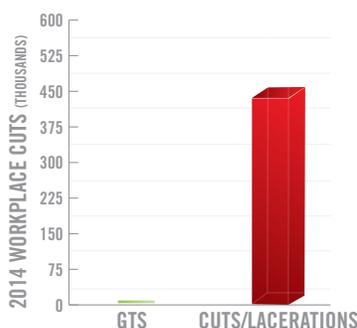

- Hidden blade completely eliminates risk of accidental lacerations
- One way ratchet handle provides a decrease in muscle effort and awkward motion to the carpal tunnel

### EASIER

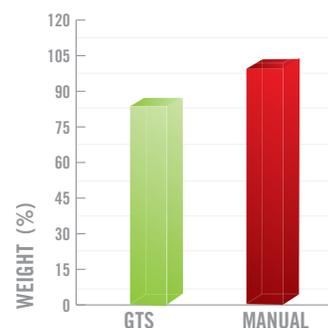

- Less than 1lb in your hand
- Rigid handle aids to decrease muscle effort to operate
- Customized turning radius to improve user comfort

### FASTER

### SAFER

### EASIER

#### Working Postures:

The one way ratcheting handle allows for less muscle strain on the forearm muscles and eliminates wrist deviation.

#### Injury Reduction:

The rigid texture of the handle provides a more secure grip on the tool and decreases the muscle effort used.

#### Accountability:

The tension grip depth stop will insure that the cut will be made at the exact measurement needed.

#### Injury Reduction:

Approximately 70% of all laceration and cuts found in the workplace are on the fingers and hands.\* The hidden blade protects the worker from accidental lacerations.
